DS24: each channel within existing fits — not channel-only localization
Association by channel; fitted c
Associated / winning GLRT (%)
Full-band fit
Respective half-band fit
Channel
Unequal amount of detected evidence
Points across 24 scans
All winning GLRT
Used in full likelihood
Channel
Carrier-normalized residuals of retained curved points
Conditional residual RMS at 11.5 GHz (Hz)
RX1
RX2
Channel
Detection yield, before track/satellite selection
Winning GLRT / processed windows (%)
