RF-only geometry guard: conservative abstention, not localization validation
Prior-supported gain can survive weak free-nuisance geometry
c0
fitted_c
Nominal Gaussian gain at SD multiplier 1
positive favors candidate; sensitivity only
Other-family displacement information after projection
(engineering threshold = 4)
Recorded C abstention reasons
Weak family-deletion information
Insufficient projected RF gain
Weak projected information
Opposing family-deletion RF
Guard arm receipts (reasons overlap)
