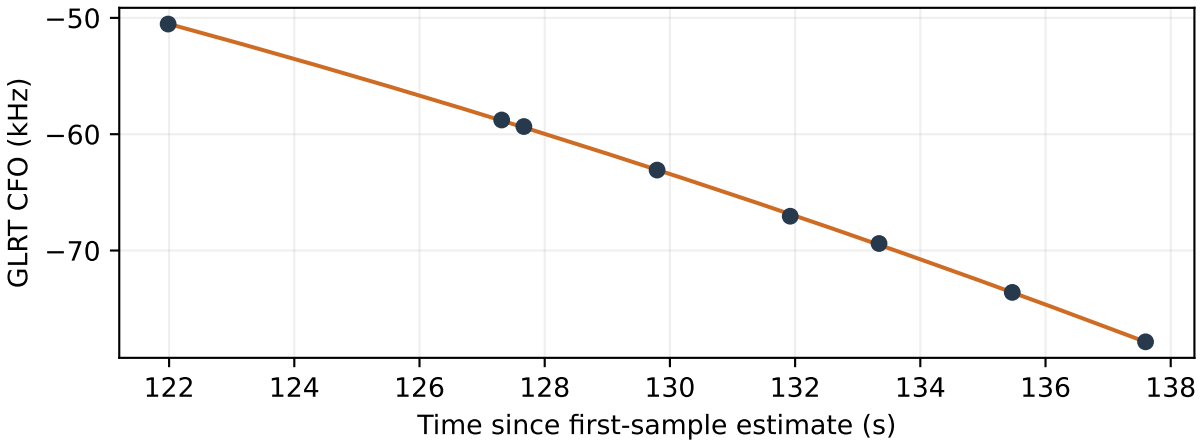
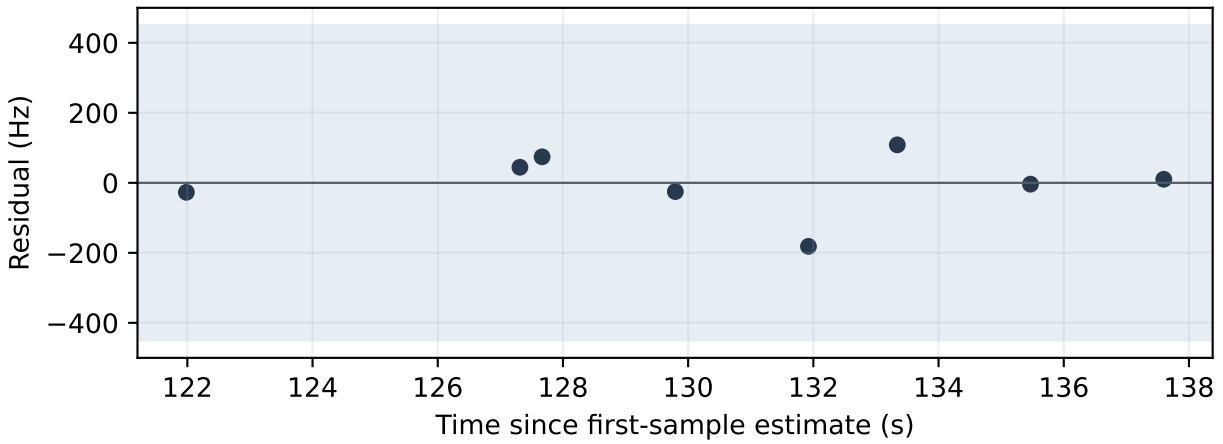
DSX01 S01 · Coherent curves left unassociated
Previous support rule required 12 observations for a quadratic

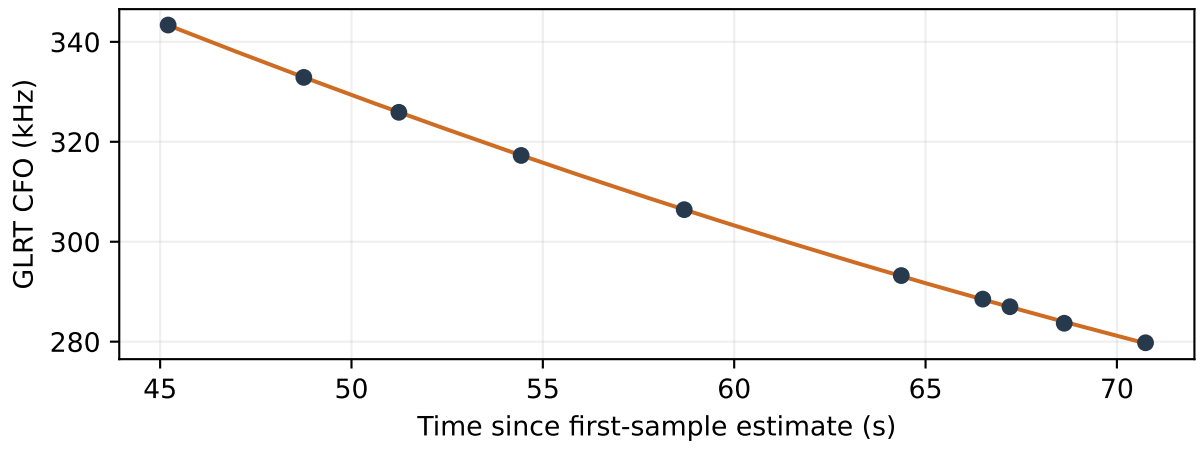
RX1 CH7 · 8 points over 15.6 s



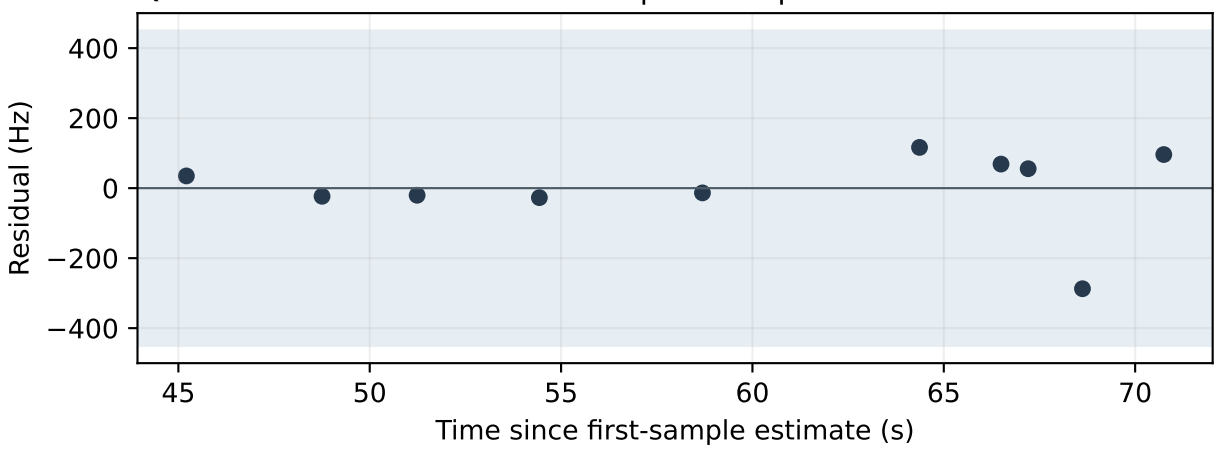
Quadratic RMS 81.9 Hz · max |residual| 181.5 Hz



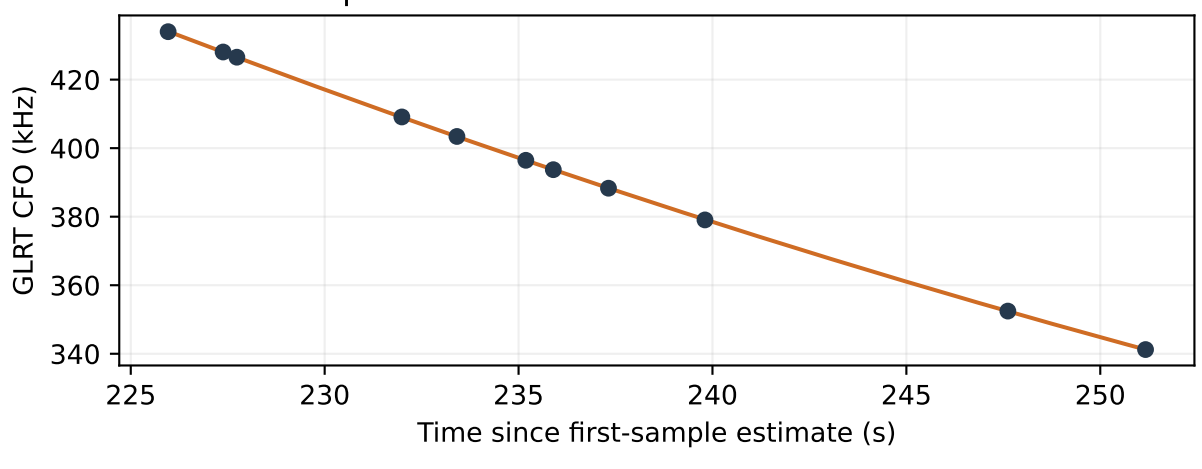
RX2 CH4 · 10 points over 25.5 s



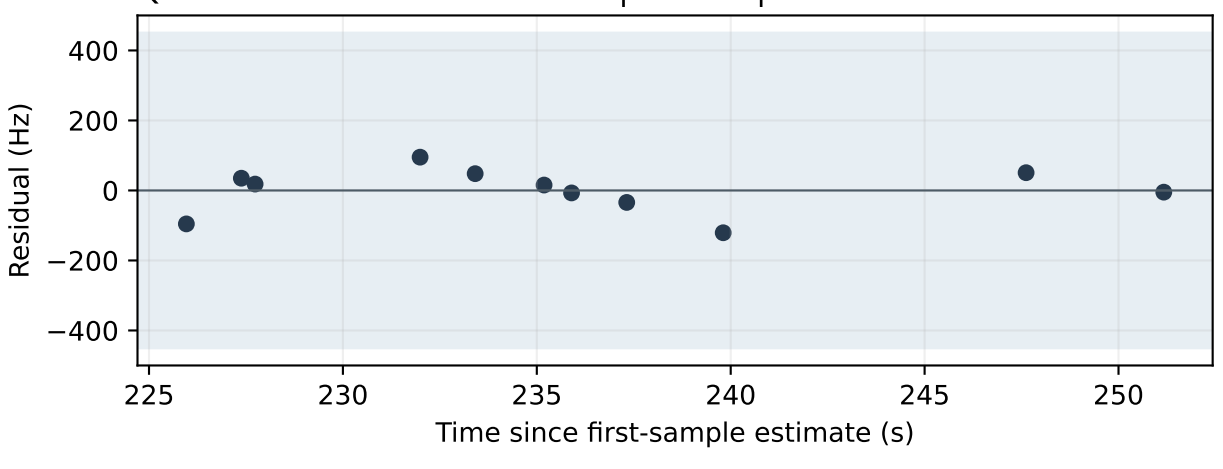
Quadratic RMS 107.8 Hz · max |residual| 287.4 Hz



RX2 CH7 · 11 points over 25.2 s



Quadratic RMS 60.8 Hz · max |residual| 120.8 Hz



Visually selected diagnostic examples. First two: all five methods missed every point.
Third: EM and Graph missed all 11; other methods missed 3. All remain short-support evidence.
