Shape uncertainty changes the preference along a fixed position segment
DS24-0095 · c = 0
DS24-0095 · fitted c
DS24-0087 · c = 0
DS24-0087 · fitted c
Zero shape covariance
Original parent component
Physical shape prior
Change in normalized objective
Fraction along baseline to saved support segment
Each branch is relative to its own value at the baseline position; lower is preferred.
Parent phase references are fixed. These segments are diagnostics, not global searches or confidence intervals.
