B115: recorded continuity and model-dependent assignments remain distinct
Passing-branch extrema are compatibility bounds, not a normalized likelihood
Measured same-lane adjacent CFO changes
Actual 2.5 MHz circle
B 227.273 kHz circle
Cumulative fraction of 1608 eligible edges
Absolute measured CFO difference, Hz
Opposite-fold same-branch score bounds
min 794.4
selected 1509.4
min 351.0
selected 727.6
Low release minus original-full NLL
Fit fold0
Fit fold1
Confident constant-MAP track increments
original-full, fold0, n=726
low-release, fold0, n=251
original-full, fold1, n=560
low-release, fold1, n=123
Cumulative fraction of selected model edges
Native-circle prediction increment error, Hz
