Matching precedes coefficient estimation
Historical older→newer forecast horizon (h)
Current nominal propagation age (h)
25 dependent descriptive forecasts
OldB − Age2 normalized coefficient score
Held energy ≥50% represented
Held energy <50% represented
Age2 wins 8/25; summed gain -150.20
One shared-snapshot group; no independent validation
Forecast in fixed ledger order
Orbit-only metadata and conditional three-coordinate densities; no RF fitting, GPS selection or calibrated orbit-error claim.
