OldB versus age-matched priors: 28 contexts where both are supported
Total standardized variance
Gaussian uncertainty volume
Mean component of uncentered moment
Primary ≥3 pairs
Exploratory 2 pairs
Age2 covariance trace
OldB covariance trace
Age2 log determinant
OldB log determinant
Age2 signed-mean energy fraction
OldB signed-mean energy fraction
30 Age2-ready contexts; two oldB fallbacks excluded. Common current physical-mode coordinates; no geographic outcomes.
