DS26 prespecified RF-only validation panel: three clipped cases + three qualified controls
Matched random groups, physical priors and c arms; annotation only, no new accepted points
Convergence repaired in all three clipped cases
Maximum final phase movement across six fits (s)
Convergence gate
15 s reference
30 s reference
0154 clipped
0044 clipped
0106 clipped
0036 control
0305 control
0028 control
Frequency scores change little; identity alone is insufficient
Held target RMS: 30 s minus 15 s (Hz)
